

TAB STORAGE SYSTEMS

SIDE-TRAC

Mobile Cabinet Solutions

If you want to make your TAB cabinets even more efficient, put our SIDE-TRAC mobile system to work. SIDE-TRAC is ideal for high-density storage environments. Cabinets are arranged in two compact rows, eliminating traditional aisle space. The front row glides from side-to-side, allowing access to the back row. Access is created only when and where it's needed.

Save Floor Space and Search Time

With our SIDE-TRAC system, you get more files in less space. And because cabinets are just a few steps apart, search time is reduced as well. SIDE-TRAC adds only two inches to the overall cabinet height. No bulky carriages are required because wheels bolt directly into existing cabinet bases.

Use any TAB Cabinet

No matter what media you store, TAB has the right cabinet for you. And every TAB cabinet quickly adapts to SIDE-TRAC, without bulky carriages or awkward overhead safety equipment.

Pair a SIDE-TRAC System with:

- Spacefinder cabinets, ideal for storing letter or legal-size files
- Harmony cabinets, attractive and cost-efficient for files or other media
- Designer Series cabinets, created for your unique storage needs

Features

Maximize your storage capacity by increasing linear filing inches with less space

Speed access to files and other stored material

Relocate with ease as your storage needs change

Level system without removing cabinets or stored material

Expand the system seamlessly as you grow

TAB STORAGE SYSTEMS

Easy to Install, Stable, and Safe

The SIDE-TRAC factory-built deck is easily installed and leveled on existing floor surfaces. The system can be expanded or relocated as your storage requirements change. The interlocking deck sections feature built-in leveling glides, preventing unwanted cabinet “drift” caused by floor irregularities. TAB’s anti-tip mechanisms are simple, effective and unobtrusive. Both mobile and stationary cabinets are fully stabilized.

Specifications

- Deck length configured to up to five cabinets per section
- Deck height adds 2” to overall cabinet height

Applications

- Decentralized file areas
- Binders, files, electronic media storage
- IT/network storage
- Secure storage

About TAB

As a recognized leader in the records and information management industry, we develop custom solutions that enable our customers to control, store and access critical information. We offer top quality filing systems, media storage equipment and specialists that solve complex records and information management challenges. With more than 50 years of experience, we serve customers in a variety of industries including legal, finance, healthcare, insurance, manufacturing, education and government.
